RESEARCH AND DEVELOPMENT

Offer

Compact GSM systems for data acquisition and communication in agriculture

Application in agriculture:

- Monitor position and activity of equipment that are used in the field (e.g. : mobile irrigation systems, etc...) ; also provides anti-theft and anti-vandal warning and tracking;
- Monitor and report soil and environment parameters by mounting the device in a pipe - like enclosure that can be easily put into the ground together with the sensors (and optionally connected to a solar panel);
- others.

Cooperation Offered

1. Manufacturing agreement
2. Technical co-operation
3. Outsourcing co-operation
