Description

Hrib d.o.o. was founded in 1991 and specialises in manufacturing, importing and wholesale. The main focus of our activity is production - packing nuts, dried fruit and snacks, roasting and production of snacks in our own roastery and vacuum drying of fruit and vegetables.

We always aim to operate in the best interest of our customers and the community. We operate environmentally friendly by using recyclable materials, supplying our production with solar energy from our own power plant, and using extra heat from our drying plant to heat the premises and water.
